VOO

**TRANSPARENT
PRICES.
IN REAL TIME.**

Counting on VOO means exact calculation, transparency and reliability. With up-to-date prices and even each pound of luggage on board.

**LIVE IS LIFE.
NOW IT'S
DATA, TOO.**

With VOO, there is only ONE time for pros: real time! The broker can see what the operator is doing. The operator can see what the broker is doing. Live. Any status change is directly visible. Annoying inquiries... is that really how we used to work?

**NOT ONLY FRIDAYS
FOR FUTURE.**

Each second, VOO optimizes the utilization of your fleet. Which saves money, but that isn't all: In business aviation, empty legs make up around 40% of all flights. Every year, these 40% needlessly cause an additional output of over 1 mio tons CO2 in the air. We're gonna change this! Together.
