

THE COMPANY

voo.aero | effortless private jet booking

EVOO

MOVING
THE SKY

Nice to know:
VOO means flight
in Portuguese

VOO is developed entirely in **Austria** and is 100% an Austrian company, **founded in 2020**.

The **VOO office** and the home-base of our development team is located in **Graz, Styria**.

THE MOVING TEAM BEHIND THE SCENE

Rene INKRET

CEO & Partner - Professional Pilot & BizAv Pro

Gernot WINTER

CFO & Partner - Business Specialist

Robert PLHAK

COO & Partner - BizAv Pro & Sales Specialist

Peter SKERL

Partner - Software Developer & Blockchain Expert

Robert GALOVIC

Partner - Energy Engineering Expert

The **idea of VOO** was born
because we all know the
existing problems of BizAv.

We know how long it takes to **book a private jet**.

We know how many **phone calls and emails** you
have to make to complete the booking process.

And we also know **how much time** brokers and
operators could save if there was a suitable plat-
form to handle the whole booking, payment and
management process.

We have developed a marketplace that is designed to **solve exactly these problems.**

VOO is the first **digital B2B marketplace** to search, book, pay and manage* your private jet flights - without switching the pages!

You get all relevant information on just **ONE PAGE!**

VOO is a revolutionary software solution that makes **communication between broker and operator easier** than ever before.

And the **prices are absolutely fair.**

FOR THE BROKER

no more dead requests

far more firm bookings

first class presence on the platform

lower costs & higher margins

better capacity utilization, more turn-over

**only ONE digital marketplace for
your entire fleet**

FOR THE OPERATOR

a broader range and better options

faster and more efficient processing

more time for marketing and sales

the prices are fair and comparable

**only ONE digital marketplace for
your entire chartering management**

We also deal with innovative and modern technologies such as **blockchaintechnology and cryptocurrencies.**

The **VOO Marketplace** is developed for the blockchain-based company **AVINOC**. You can find the original and first ideas about **VOO** in the **AVINOC whitepaper.**

AVINOC has its own **token** that can be traded on many international crypto exchanges.

The **token** is like a **corporate share** in **AVINOC** and **VOO** and will also be integrated into the **VOO loyalty program.** **AVINOC** token will be credited to your **VOOwallet** in the form of cash back after successful flight booking.
