

VOO Announces a New Integration with Leon

11 May 2023

VOO, the B2B private jet marketplace that delivers instant bookings, will be integrated with Leon, a web-based aviation software supporting flight operations management and scheduling software for business charter, in middle May 2023. This integration covers the key functionalities to make the charter sales more efficient and will facilitate traceable, effortless, and flawless operations leading to instant bookings.

By synchronizing the schedule with VOO, the digital B2B marketplace for private jet charters, users are able to search, book and pay for all their charters based on accurate and real-time information. Leon automatically sends all booked flights to VOO, delivering real-time availability and aircraft location information that VOO uses to calculate and provide accurate and valid charter prices. Additionally, operators can synchronize each VOO booking with Leon to receive the same benefit. Leon bookings can be processed in Leon, and VOO bookings in VOO.flights without conflicts with aircraft availability.

Thanks to VOO's smart data transfer, the flight can be quickly imported into the Leon OPS module, making Leon more efficient. This automation increases the daily operational performance, as all the data from the sealed deal can now be transferred to the operational teams. VOO calculates accurate quotes, so brokers can book instantly, and payments can be made 24/7 with VOOpay, even on weekends and holidays – all with maximum speed and high security of data transfer provided by VOO.

“Leon Software is the central hub for managing critical data and maintaining high levels of efficiency for many operators. By providing integration with VOO, we eliminate the need to transfer data between different systems by enabling automatic exchange, saving time and effort. So, VOO means a lot less waiting and a lot of more safety for our clients deals.” – Paweł Szmagaj, CTO at Leon Software.

“We are excited about our partnership with LEON! This will improve the charter sales experience for all VOO operators who use LEON as their preferred flight management system. By synchronizing
